

NAN PHYU SIN MAUNG

Software Engineer

Singapore | nanphyusinmaung@gmail.com | +65 9101 7160 | [Linkedin](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Fresh Computer Science graduate specializing in AI and Big Data, with hands-on experience in full-stack development, AI integration, and data processing. Skilled in Python, Java, TypeScript, and C++.

EXPERIENCE

Independent Software Engineer (Self-directed Projects) — Singapore
2026 – Present

SKILLS

Languages : Python, TypeScript, JavaScript, Java, C++, SQL

Web Development : React, Next.js, Node.js, REST APIs, WebSocket, Tailwind CSS, Prisma

Data & AI : Apache Spark, Hadoop, PostgreSQL, MySQL, MongoDB, HuggingFace Transformers, OpenAI API, Azure AI Foundry, Pandas, Matplotlib

Cloud & Tools : AWS, Microsoft Azure, Supabase, Vercel, Git/GitHub, Playwright, Vitest

EDUCATION

Bachelor of Computer Science (Big Data), Distinction — University of Wollongong (SIM)
Oct 2024 – Sep 2026

Diploma in Information Technology, CGPA 3.94 / 4.00 · Mapletree Bronze Award for academic excellence — Singapore Institute of Management
Oct 2023 – Sep 2024

CERTIFICATIONS & LEADERSHIP

- AWS Certified Solutions Architect – Associate (Oct 2026) · AWS Certified Cloud Practitioner (Sep 2026) · IBM Data Engineering Professional Certificate (Oct 2026)
- **General Subcommittee Member, SIM IT Club (2025–26)** · Impetus Award, SIM Student Leaders Awards 2026

PROJECTS

Tasking — Smart Task Allocation Platform | Final Year Project

- Built SME workforce platform (Next.js, TypeScript, Supabase) with 8 user roles for recruitment, scheduling and reporting
- Integrated OpenAI for AI job posting, task assignment and anomaly detection; tested with Playwright and Vitest

Emochi — AI Emotion Support App | Best Use of Microsoft Stack & Community Choice, Hackexperience 2026

- Built multi-agent AI app (Next.js, Azure AI Foundry) with 8 emotion characters, real-time debates and Entra ID login

Crimson Midnight — AI Murder Mystery Game | 1st Place, Tech Innovation (AI) & Community Choice, ITCamp 2026

- Built Next.js front-end for AI detective game with dynamic NPC dialogue and branching endings; deployed on Vercel

Neural Machine Translation Study | Python, HuggingFace Transformers

- Fine-tuned 3 NMT models across 6 translation directions on 100M sentence pairs, reaching BLEU 40.12 with FP16 training
